## LISTING OF THE CLAIMS:

This listing of claims will replace all prior versions, and listings, of claims in the application:

## 1. - 4. [canceled]

- 5. [currently amended] An isolated nucleic acid molecule comprising a nucleic acid sequence encoding a polypeptide comprising an amino acid sequence selected from the group consisting of:
  - a) a mature form of the amino acid sequence given SEQ ID NO: 8, 10, 12 and 14;
  - b) a variant of a mature form of the amino acid sequence selected from the group eonsisting of SEQ ID NO: 8, 10, 12 and 14, wherein any amino acid in the mature form of the chosen sequence is changed to a different amino acid, provided that no more than 15% of the amino acid residues in the sequence of the mature form are so changed;
  - c) the amino acid sequence selected from the group consisting of SEQ ID NO: -8, 10, 12 and 14;
  - d) a variant of the amino acid sequence selected from the group consisting of SEQ ID NO: 8, 10, 12 and 14, in which any amino acid specified in the chosen sequence is changed to a different amino acid, provided that no more than 15% of the amino acid residues in the sequence are so changed;
  - e) a nucleic acid fragment encoding at least a portion of a polypeptide comprising the amino acid sequence selected from the group consisting of SEQ ID NO: 8, 10, 12 and 14, or any variant of said polypeptide wherein any amino acid of the chosen sequence is changed to a different amino acid, provided that no more than 10% of the amino acid residues in the sequence are so changed; and
  - f) the complement of any of said nucleic acid molecules.
- 6. [original] The nucleic acid molecule of claim 5, wherein the nucleic acid molecule comprises the nucleotide sequence of a naturally occurring allelic nucleic acid variant.
- 7. [original] The nucleic acid molecule of claim 5 that encodes a variant polypeptide, wherein the variant polypeptide has the polypeptide sequence of a naturally occurring

polypeptide variant.

- 8. [original] The nucleic acid molecule of claim 5, wherein the nucleic acid molecule comprises a single nucleotide polymorphism encoding said variant polypeptide.
- 9. [currently amended] The nucleic acid molecule of claim 5, wherein said nucleic acid molecule comprises a nucleotide sequence selected from the group consisting of
  - a) the nucleotide sequence selected from the group consisting of SEQ ID NO: 7, 9, 11 and 13;
  - b) a nucleotide sequence wherein one or more nucleotides in the nucleotide sequence selected from the group consisting of SEQ ID NO: 7,9,11 and 13 is changed from that selected from the group consisting of the chosen sequence to a different nucleotide provided that no more than 15% of the nucleotides are so changed;
  - c) a nucleic acid fragment of the sequence selected from the group consisting of SEQ ID NO: 7, 9, 11 and 13; and
  - d) a nucleic acid fragment wherein one or more nucleotides in the nucleotide sequence selected from the group consisting of SEQ ID NO: 7, 9, 11 and 13 is changed from that selected from the group consisting of the chosen sequence to a different nucleotide provided that no more than 15% of the nucleotides are so changed.
- 10. [currently amended] The nucleic acid molecule of claim 5, wherein said nucleic acid molecule hybridizes under stringent conditions to the nucleotide sequence selected from the group consisting of SEQ ID NO: 7, 9, 11 and 13, or a complement of said nucleotide sequence.
- 11. [original] The nucleic acid molecule of claim 5, wherein the nucleic acid molecule comprises a nucleotide sequence in which any nucleotide specified in the coding sequence of the chosen nucleotide sequence is changed from that selected from the group consisting of the chosen sequence to a different nucleotide provided that no more than 15% of the nucleotides in the chosen coding sequence are so changed, an isolated second polynucleotide that is a complement of the first polynucleotide, or a fragment of any of

them.

- 12. [original] A vector comprising the nucleic acid molecule of claim 11.
- 13. [original] The vector of claim 12, further comprising a promoter operably linked to said nucleic acid molecule.
- 14. [original] A cell comprising the vector of claim 12.
- 15. 26. [canceled]
- [original] A pharmaceutical composition comprising the nucleic acid molecule of claimand a pharmaceutically acceptable carrier.
- 28. 29. [canceled]
- 30. [original] A kit comprising in one or more containers, the pharmaceutical composition of claim 27.
- 31. 35. [canceled]
